

COGNIGENCE

Charitable giving that gives back.

COGNIGENCE MAKES YOUR CONTRIBUTIONS MATTER

You want your contributions to make a difference. Cognigence makes sure they do. We invest your tax-deductible donation with others to support your cause, achieve far-reaching effects and provide the opportunity to receive a return on your gift.

Unlike conventional charitable giving, our unique impact donation model provides you with the opportunity to achieve both emotional and financial returns for your donation.

Your donations will be used to support non-profits and philanthropic projects through:

- Grants and research to fund the progression of technology, systems and solutions
- Direct funding for causes
- Investments in specific areas that provide a social good and financial return

HOW WE WORK

Cognigence is a unique company in the Venture Philanthropy and Social Impact space. We help socially conscious individuals invest their funds in areas and issues that are connected to their values, and they are passionate about improving.

Our funding supports research, programs and technology that benefit all people, regardless of origin, race, politics, religion or status of life by providing an improved quality of life on both the individual and civilization levels.

We provide:

- **Impact** – You choose from multiple causes where to donate your funds.
- **Commitment** – Other organizations spend \$.50-\$.80 per dollar donated on operations. At Cognigence, we use as little as \$.25 per dollar for operations.
- **Transparency** – You will know where your money is being used and we will use the Harvard SROI scale to measure your contribution's impact.
- **Success** – Our system allows us to give back a portion of any equity invested.

We're currently focused on areas that have both a large financial burden on the impact of health care systems, as well as the quality of life of those afflicted across the globe:

MedTech - Investments support technologies that improve the healthcare ecosystem and provide better outcomes.

Cancer - We fund innovations to help reduce the global cancer burden and promote greater equity in treatment.

Diabetes - We invest in organizations developing solutions to reduce the burden of diabetes on our healthcare systems and improve the lives of individuals with the disease.

Autoimmune Diseases - We prioritize research to reduce complications from autoimmune diseases, increase quality of life and cut costs for treatment.

Green Earth - We invest in innovations that combat climate change and make use of untapped resources.

Underprivileged - Our investments provide resources to improve the lives of the more than 700 million extreme poor.

MAKE AN IMPACT. RECEIVE A RETURN.

We leverage our conscience, passion, and competencies to push the frontiers of venture philanthropy and social impact. When you contribute to Cognigence, not only do you make a positive impact on the community you're passionate about, but you also receive the opportunity to generate a financial return on your gift.
